

MOHD MUNAWWER ALI USMANI

munawwer587@gmail.com | +91 7067663078 | www.linkedin.com/in/mohdmunawwer | www.github.com/Munawwer001

Highly motivated and aspiring Software Developer with a solid grasp of **Data Structures & Algorithms (DSA)** and practical experience in **Web Development**. A fast learner with an ever-growing mindset, I'm excited to dive into new technologies and contribute to innovative projects.

Education

- | | |
|----------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------|
| <ul style="list-style-type: none">VIT BHOPAL UNIVERSITY
Bachelor of Technology (B.Tech)
Computer Science & Engineering | Bhopal, MP
2022 – 2026 |
| <ul style="list-style-type: none">St. Joseph Inter College
Class – 12th ICSE Board (PCM + Computer) – 83% | Lucknow, UP
2021 |
| <ul style="list-style-type: none">St. Joseph Inter College
Class – 10th ICSE Board (Science + Computer) – 81% | Lucknow, UP
2019 |

Technical Skills

- Programming Languages** – C/C++, Java, Python, HTML, CSS, JavaScript
- Database** – SQL
- Libraries** – React.js
- Version Control System** – Git, GitHub
- Cloud Platforms** – AWS
- Soft Skills** – Problem-Solving, Communication, Team Work, Code Review, Debugging

Projects

- Super Store Sales Management | October 2023**
 - Led a cross-functional team** in the end-to-end development of a Super Store Sales Management System, overseeing project planning, task delegation, and ensuring timely delivery.
 - Designed and implemented dynamic and user-friendly frontend interfaces** using HTML, CSS, and ReactJS, significantly improving data visualization and user interaction.
 - Developed robust backend services with JavaScript (Node.js)** to manage sales transactions, inventory, and user authentication, ensuring efficient data processing and system stability.
 - Integrated and managed data persistence** by connecting the application to SQL databases, optimizing data storage, retrieval, and integrity for critical business operations.
- Captcha Text Generator and Solver | February 2024**
 - Developed a full-stack Captcha Generator and Solver** system, comprising both frontend and backend functionalities.
 - Leveraged Machine Learning to accurately predict captcha text, creating a versatile security tool for diverse web applications.
- Agro-Aid | March 2025**
 - Contributed to frontend development** within a collaborative team to build the Agro-Aid website.
 - Designed and implemented the **backend infrastructure for the website's integrated forum functionality**.
 - Supported Machine Learning initiatives by conducting essential research** on datasets for predictive model development.

Achievements

- Solved over **150 Data Structures and Algorithms (DSA)** questions across various coding platforms.
- Achieved a **5-star Java Coder rating on Hacker Rank**, reflecting advanced proficiency and problem-solving capabilities in Java.
